OVERFLOW
(LOCATED BEHIND
FLOAT)

A schematic diagram of a mechanical assembly, likely a pump or engine component. The diagram shows a central horizontal shaft with a pulley on the right end. A curved pipe or duct is connected to the left side of the shaft. A rectangular box is mounted on top of the assembly. A vertical pipe or duct is connected to the bottom of the assembly. A small circular component is located on the right side of the shaft. A rectangular box is located at the bottom left of the assembly. A small circular component is located at the bottom right of the assembly. The diagram is labeled with numbers 1 through 10, corresponding to the following parts:

- 1: Top rectangular box
- 2: Curved pipe/duct
- 3: Horizontal shaft
- 4: Pulley on the right end of the shaft
- 5: Vertical pipe/duct
- 6: Rectangular box at the bottom left
- 7: Small circular component at the bottom right
- 8: Small circular component on the right side of the shaft
- 9: Small circular component on the right side of the shaft
- 10: Small circular component on the right side of the shaft
